

UKTI Market Visit to Switzerland

An opportunity to meet a group of highly experienced drug discovery CROs from Nottingham, UK.
Geneva - 25th February, Basel - 26th February 2014

Delegate Profiles:

Aurelia Bioscience

visit: www.aureliabio.com

- Specialists in bio-assay development, plate-based pharmacology, compound screening and instrument/ reagent consultancy.
- Highly experienced in driving successful early stage drug discovery projects.
- Expert data interpretation and problem solving provided at all times.
- Cell-based and biochemical readout technologies utilised to give the best outcome e.g. FLIPR, FMAT, Envision, Enspire (label free)
- Compound screening at low/medium/higher throughput in 96 or 384 well format.
- Facilitate your projects through outsourcing of bio-assays, bespoke screening solutions and primary/iterative screening.

Charnwood Molecular

visit: www.charnwood-molecular.com

- Excellence in Synthesis for Lead Discovery, Lead Optimisation and Development.
- Custom synthesis
- Contract research
- Medicinal chemistry
- Process development
- Ultimate compound profiling
- Synthesis of building blocks for library generation, libraries, non-literature targets, intermediates, metabolites, reference standards, drug impurity compounds, patent analogues and client proprietary compounds.

Reach Separations

visit: www.reachseparations.com

- Offering chiral, reverse phase and normal phase chromatography.
- From milligram up to at least 100g scale.
- Collective pharmaceutical experience of nearly 40 years.
- An outsource partner with clear insight, understanding and capabilities aligned with the customer.
- 4 chromatographic systems dedicated to specific techniques, fitted with automated column and solvent switching, controlled by our own in-house custom macros, enabling time efficient, cost effective and environmentally aware solutions.
- The wide variety of chiral and achiral columns adds to our capability allowing us to find the best and most efficient separation for our clients requirements.

Source Bioscience

visit: www.lifesciences.sourcebioscience.com

- A world leading provider for DNA sequencing, clones, antibodies and bioinformatics.

Our services include:

- Next Generation Sequencing
- Sanger Sequencing
- Exome sequencing service
- Gene Expression
- Bio-informatics and data analysis
- DNA Extraction and Whole Genome Amplification
- Genotyping Services

Xenogesis

visit: www.xenogesis.com

- Experts in DMPK/ADME, Xenogesis supports all key Discovery Disciplines.
- Physicochemical assays, in vitro DMPK/ADME assays, Cytochrome P450 Assays, Metabolic stability, Transporter studies, Pharmacokinetics, Bioanalysis, Expert interpretation, Customised laboratory services.
- Bespoke studies to answer specific issues e.g. is my compound a substrate for the SSAO enzyme?
- With an enviable track record in drug discovery we are not just data providers. We can provide recommendation of follow up studies, prediction of animal and human PK from *in vitro* data, compound design, dose study planning and PK(TK)/PD analysis.

visit: www.biocity.com

BioCity Nottingham offers a fantastic location in the Creative Quarter, at the heart of a designated Science City and is home to more than 70 businesses working in the life sciences sector .

BioCity Nottingham is both a creator and consolidator of research and thought leadership in the life sciences industry.

Early Stage Drug Discovery Partnering with CROs from the UK

Presentation and Networking Lunch

A unique opportunity to meet a group of highly experienced drug discovery CROs from Nottingham (see technical profiles attached) and to network with other professionals in the sector.

Programme:

- 10.00 - 10.15 Welcome and Introductions
- 10.15 - 12.00: Short presentations by
- Aurelia Bioscience
 - Charnwood Molecular
 - Reach Separations
 - Source Bioscience
 - XenoGesis
- 12.00 - 12.30: Q&A and round table discussion
- 12.30 - 14.00: Networking Lunch hosted by
Mr Matthew Peters,
Head of UK Trade & Investment
Switzerland

Event Date:

Tuesday 25 February 2014

Venue:

British Government Offices*
58 Avenue Louis Casati
1216 Cointrin-Geneva

* Visitors' Parking available

For more information and to register your attendance:

Marie Gow, Trade Officer
British Embassy - Geneva
